## FABRICS

	Description, Construction, Composition, Weight, Finishing, Washing	Color (Pantone)	Position
1.	Gabardine is suggested due to its structure and after assessing the garment's drape. A blend of polyester and rayon provides balance in durability and comfort. The weight of 280 GSM is appropriate for a trench coat, allowing for warmth without bulk. A matte soft-touch finish enhances the garment's premium look.	Daffodil	Shell Fabric
2.	Specified for the collar and zipper area to provide stability, ensuring the trench coat maintains its shape and structure.	Black	Fusible Interfacing
3.	Added at the asymmetrical shoulder seam to prevent sagging, maintaining the sleek, tailored appearance.	Clear	Clear Elastic
4.	Also placed on the shoulder seam, reinforcing the fabric to support the design and prevent stretching.	N/A	Stay Tape
